L'azienda RADICI PIETRO INDUSTRIES & BRANDS SPA fondata nel 1950 è parte del Miro Radici Family of Companies, una realtà internazionale composta attualmente da 130 società con oltre 4.000 dipendenti.

All'interno della nostra azienda la tessitura tradizionale wilton, quella face to face ed il tufting consentono di ottenere tutte le possibili varianti di moquette (riccio, velluto, frisè, saxony, cut – loop, cross – over), in fibre naturali oppure sintetiche.

Fiore all'occhiello è sicuramente la moquette tessuta realizzata con telai wilton jacquard e telai face to face che grazie alle moderne tecnologie di tessitura, consentono di personalizzare colori e disegno con un'ottima definizione.

Per quanto riguarda le moquette tufted, oltre ai molteplici prodotti di collezione con una gamma cromatica fino a 100 colori, anch'esse possono essere personalizzate in base alla richiesta del cliente. Infatti, grazie allastampachromojet è possibile realizzare qualsiasi tipo di disegno fino ad un massimo di 12 colori.

Saper rendere semplici anche i progetti più complessi fa parte del nostro impegno quotidiano; per questo all'interno della Radici Pietro Industries & Brands Spa, da qualche anno è nata una divisione contract che si occupa proprio di sviluppare qualsiasi progetto piccolo o grande che sia.

L'inizio di uno studio avviene in seguito alle indicazioni ricevute dal cliente o architetto; vengono studiati i disegni e inviati in diverse proposte tramite posta o e – mail.

Dopo aver ricevuto la preferenza dal cliente si procede con la preparazione del campione per l'approvazione finale.

Nel frattempo l'ufficio tecnico al quale sono pervenute le planimetrie del locale o costruzione interessata dall'intervento, elabora il piano di posa con l'intento di presentare al committente la soluzione ottimale dal punto di vista tecnico-estetico.

In base all'area di destinazione è infatti possibile progettare tappeti e bordi a misura al fine di limitare le giunte e uno spreco eccessivo di materiale.

Il servizio e l'assistenza dedicata ad ogni singola commessa non comportano alcun

costo aggiuntivo in quanto da sempre li consideriamo come una delle componenti chiave per la soddisfazione del cliente.

La particolare attenzione applicata ad ogni progetto e alla procedura con cui viene sviluppato, ci ha consentito di far conoscere e apprezzare le nostre moquette nel mondo del contract. Ogni giorno, milioni di persone camminano su moquette Sit-in e Due Palme: nei grandi alberghi come il Villa D'Este di Cernobbio, il Principe di Savoia di Milano, Il George V di Parigi, la catena degli Holiday Inn, o nelle prestigiose navi da crociera come Princess, P&O, Costa e Carnival Cruises.

Siamo specializzati nel valorizzare la bellezza di ogni idea creativa con soluzioni di stampa o di tessitura all'avanguardia.

Uniamo tutto il fascino di un lavoro che richiede grande attenzione e tanta sensibilità, a tecnologie capaci di prestazioni di altissimo livello per eleganza, estetica e cura del dettaglio.

*LasciateVi
conquistare...*

last few years numerous projects, ranging from the very small to extremely large and intricate, have been followed through by our dedicated contract division.

An in-depth study of the installation project begins following instructions from the customer or architect; designs are developed and they are sent as part of different proposals by post or e-mail.

When the customer has chosen among the various proposals, work starts on the preparation of samples for final approval.

In the meantime the technical office, having received the floor plans of the areas involved, develops the laying plan so as to present the customer with the most attractive and technologically sound result possible.

Carpets and borders are designed specifically for the laying areas, in order to limit the joints and optimise carpet usage, reducing waste to the bare minimum.

The service and assistance provided with each individual order is supplied at no extra cost, because we have always considered it as one of the key components in our customer's satisfaction.

The particular care lavished on each project and the way in which they are developed has enabled us to get our carpets known and appreciated in the world of contract. Every day, millions of people walk on Sit-in and Due Palme carpets, our most known brands: in luxurious hotels such as Villa D'Este in Cernobbio, Principe di Savoia in Milan, George V in Paris, the Holiday Inn group or on prestigious cruise ships such as Princess, P&O, Costa and Carnival Cruises.

We are specialised in bringing out the beauty of every creative idea using state of the art printing or weaving methods.

At Radici the closest attention to detail and a the profound sensitivity poured in the design work are brought together with technologies that can provide products of the highest standard for their elegance, appearance and the care that goes into the smallest detail.

Radici Pietro Industries & Brands was established in 1950 as a Woven carpet factory, and is grown into a multifaceted international textile group, without losing its original identity: a factory of carpets that cares for its customers and works with its customers.

Within our company, traditional weaving and face to face wilton along with tufting machinery allow all possible types of wall-to-wall carpeting: loop, cut (velvet, saxony, friese), cut-loop and cross-over in natural or man-made fibres.

Our biggest pride is certainly the woven Wilton-Jacquard and face-to-face looms that make customisation colours and designs possible with outstanding definition, thanks to modern weaving technologies.

As for tufted carpeting, in addition to the many products in the collection boasting up to 100 colours, the carpets can also be tailored to the wishes of the customer. With the Chromojet printing technique, any type of design can be created, including up to 12 colours.

Being able to make even the most complex designs simple for our customers is part of our day to day work; during the
